Decomposing Polygons to Find Area

Directions: Decompose each polygon into rectangles and triangles to find the area.
1. Section the shape into rectangles and/or triangles.
2. Find the area of each rectangle and triangle.
3. Find the total area of the polygon.

1. Section into rectangles or triangles.

2. Section into rectangles or triangles.

3. Section into rectangles or rectangles

4. Section into rectangles or triangles.

5. Create your own polygon. You will need to be able to divide your polygon into at least 3 triangles and/or rectangles. Solve.

Total Area=

Total Area=

Total Area=

Total Area=
Key- One possible solution is given. However students may solve each problem in various ways.

**Decomposing Polygons to Find Area**

Directions: Decompose each polygon into rectangles and triangles to find the area.
1. Section the shape into rectangles and/or triangles.
2. Find the area of each triangle and rectangle.
3. Find the total area of the polygon.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Work Space</th>
<th>Total Area</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>6 cm x 6 cm = 36 cm²</td>
<td>36 cm² + 36 cm² = 72 cm²</td>
</tr>
<tr>
<td>2</td>
<td>6 cm x 6 cm = 36 cm²</td>
<td>Total Area = 72 cm²</td>
</tr>
<tr>
<td>3</td>
<td>8 in x 4 in = 32 in²</td>
<td>32 in² + 9 in² = 41 in²</td>
</tr>
<tr>
<td>4</td>
<td>6 in x 4 in = 24 in²</td>
<td>6 in x 4 in = 24 in²</td>
</tr>
</tbody>
</table>

Section into rectangles or triangles.
